MEDICAL CENTER LIBRARY

January 26, 2021

MEMORANDUM

FOR : ALL FACULTY/RESIDENT/CLINICIANS/AND ALL CONCERNED

SUBJECT : RENEWED SUBSCRIPTION OF COCHRANE LIBRARY DATABASE

THRU : DEPARTMENT HEAD

Please be informed that we have renewed the subscription to Cochrane Library Database from Wiley.

The **Cochrane Library** is a collection of databases in medicine and other healthcare specialties provided by Cochrane and other organizations. At its core is the collection of Cochrane Reviews, a database of systematic reviews and meta-analyses which summarize and interpret the results of medical research. The Cochrane Library aims to make the results of well-conducted controlled trials readily available and is a key resource in evidence-based medicine.

The Cochrane Library consists of the following databases:

The Cochrane Database of Systematic Reviews (Cochrane Reviews). Contains all the peer-reviewed systematic reviews and protocols prepared by the Cochrane Review Groups.

The Database of Abstracts of Reviews of Effects (DARE). Contains quality-assessed abstracts of systematic reviews, including a summary of the review and a critical appraisal of its overall quality.

The Cochrane Central Register of Controlled Trials (CENTRAL). Is a database that contains details of articles of Controlled trials and other studies of healthcare interventions from bibliographic databases (majorly MEDLINE and EMBASE), and other published and unpublished sources that are difficult to access.

The Cochrane Methodology Register (Methodology Register). Is a bibliography of publications that report on methods used in the conduct of controlled trials.

Health Technology Assessment Database (HTA). Brings together details of completed and ongoing health technology assessments (studies of the medical, social, ethical and economic implications of healthcare interventions) from around the world.

NHS Economic Evaluation Database (NHS EED). This database systematically identifies economic evaluations from around the world, appraises their quality, and highlights their relative strengths and weaknesses.

The Cochrane Reviews, CENTRAL, Methodology Reviews and Methodology Register are produced by the Cochrane Collaboration. DARE, HTA and NHS EED are compiled and maintained by the Centre for Reviews and Dissemination.

For the onsite access, use any computers connected to the Information Technology Department and log on <http://www.cochranelibrary.com> For the remote access, log on to the UERM portal, click the default type of user and key in your password then click the Cochrane Library icon and it will automatically log in.

For further details please call the library at 8715.08.61-77 loc.355. or email us at library@uerm.edu.ph

Kindly disseminate this information to your colleagues and we encourage you to maximize the use of this database.

MARIA JULIANA N. GASMEN, RL, MLIS
Chief Librarian
